

DARREN POTTS

INTERMEDIATE SOFTWARE ENGINEER

ABOUT ME

As a skilled software engineer, I bring extensive knowledge of both frontend and backend development such as Angular, Flutter, React, .Net Maui, and C# and more to the table. I am a proactive problem-solver who values collaboration and communication with colleagues and clients. With a sharp focus on emerging trends and best practices I ensure that my work remains at the forefront of the industry. I have a proven track record of delivering high-quality results in fast-paced environments.

WORK EXPERIENCE

2022-Present SOFTWARE ENGINEER

Agile Bridge / Pretoria

- Collaborated with cross-functional teams to design and develop software products for the automotive, insurance, and financial industries, including projects such as WeBuyCars and Dashpay.
- Wrote efficient code and conducted code reviews to ensure high quality of the codebase.
- Developed and maintained APIs using RESTful web services and worked with databases such as SQL, SQLite, and Redis.
- Worked as the sole developer on a team to create a new software product with offline capabilities, aimed at increasing efficiency, improving the user experience, and optimizing process flow.
- Proficient in Git, Azure, and other software development tools.
- Integrated state management solutions to projects to improve performance and code maintainability.
- Provided support to production environments and delivered effective solutions.

2020-2021 FULL STACK DEVELOPER

FlowTech Africa / Centurion

- Developed full-stack web applications using ASP .Net Core, MSSQL, and APIs
- Created an event capturing application using React Native and .Net Web API
- Collaborated with team members to deploy an e-commerce system
- Designed and implemented reports and dashboards using SSRS
- Optimized internal management and data storage systems using Laserfiche
- Managed internal servers and led development teams on multiple projects.
